# Flexible pointing for your tiled roof – no worries

## A flexible permanent solution

Unlike traditional cement, Starpoint flexes with movement in the roof structure. There is no problem with ugly efflorescence and the colour remains stable. Starpoint is designed to withstand cyclonic winds.

## Easy to use

Starpoint is ready to use. There's no need for messy tinting or mixing, and because it is water-based, cleaning-up is simple. Starpoint is environmentally friendly and is safe to use. When stored correctly it has an excellent shelf life.

## Proven reliability

Starpoint has been designed and manufactured by a team with many years experience in the roofing industry.

As a second generation product, Starpoint has had the benefit of extensive real-life and laboratory testing.

In addition Starpoint has been tested to Australian Standard AS 4046.8-2006 by a leading Australian scientific organisation, and meets the requirements of Australian standard AS 2050-2002.

A copy of the full report is available on request.

## Guaranteed

When used according to instructions Starpoint will last for at least 10 years. We guarantee it.
