

## Environmental Management Policy

---

Acryloc Building Products will conduct its business so as to minimize undesirable effects on the environment in every part of its operations and will commit sufficient resources to enable its environmental objectives and targets to be met.

The Company is committed to operating an environmental management system complying with Australian and International Standards, environmental legislation, regulations and subscribed codes of practice. The environmental management system is subject to continual improvement and is based on the requirements of ISO 14001:2015 International Standard for Environmental management.

The company is committed to the protection of the environment, including the prevention of pollution and other forms of environmental impact as they may potentially occur. Furthermore, management is committed to the ongoing improvement of its processes and our environmental management system. We will continuously strive towards cleaner methods of production and operational control. We will apply continuing efforts to reduce consumption of resources and minimize production of waste by enhancing environmental awareness and, where practicable, redesigning products and processes to minimize their environmental effects.

The company will conduct regular monitoring and reviews of its environmental performance against established standards and will comply with legal and moral requirements relative to its environmental aspects. These activities will be designed to be compatible with its quality assurance and occupational health, safety & welfare systems.

Acryloc will achieve the standards required by applicable environmental legislation and will be proactive in assisting government, local authorities, regulatory agencies and the community to develop solutions to issues of environmental concern. We are firmly committed to enhancing our environmental performance year on year and, in doing so, consider climate change and other impacts as we go.

The substance and intent of this environmental policy will be communicated to employees at all levels by the provision of appropriate education and training. Other stakeholders, such as the local community, contractors and suppliers, will also be made aware of the commitment of Acryloc to its environmental policy.
