

Safety Policy

Acryloc Building Products is committed to providing a safe and healthy workplace by:

- Providing safe and healthy working conditions for the prevention of work-related injury and ill health
- Promoting and enhancing work health safety for all stakeholders
- Complying with ISO 45001:2018, legislation and other mandated requirements to which we must meet
- Establishing a framework of measurable Safety based Objectives and Targets
- Ensuring continual improvement in all of our safety management system, endeavors, the control of hazards and the prevention of accidents and incidents
- Using our own Internal and contracted external resources as required in the execution of our WHS responsibilities

In meeting our Duty of Care to all persons in the workplace, we have developed, and we maintain processes for:

- Identification of WHS specific responsibilities and accountabilities within our Position Descriptions, and compliance with those Responsibilities
- Ensuring the elimination of hazards in the workplace
- Consultation and participation with our workers (and where appropriate workers' representatives) in safety improvement
- Monitoring and reviews of WHS performance and compliance
- Developing and maintaining appropriate Consultation and Communications strategies for WHS
- The Identification and Assessment of WHS hazards in the workplace; control of these hazards within the prescribed Hierarchy of Controls and Residual Risk Evaluation
- Contractor Management
- Rehabilitation as a means to maintaining the dignity of the individual, whilst returning any injured person to meaningful work as soon as is practicable after any incident
- Equitable claims management for personnel injured at work

The substance and intent of this WHS policy will be communicated to employees at all levels by the provision of appropriate education and training. Other stakeholders, such as the local community, contractors and suppliers, will also be made aware of the commitment of Acryloc to its WHS policy as appropriate.
